# Number Hive Puzzle 3

Being good at thinking logically is important but it takes practice. Practice your logical thinking skills on this Number Hive Puzzle.

Each hexagon must be given a number as follows:
- The hexagon in an area with one hexagon must hold number 1.
- The hexagons in an area with two hexagons must hold the numbers 1 and 2.
- The hexagons in an area with three hexagons must hold the numbers 1, 2 and 3.
- … and so on.

BUT
- No two hexagons that touch can hold the same number.
